Career Assessments

Last Modified on 09/02/2026 2:18 pm PDT

Take a **free** career assessment to find out which jobs might be a good fit for you or to help you narrow down your job search. Here is a list of options depending on how much time you have:

Have 5 minutes?

The 123 Career Test has 15 picture questions and should take approximately 5 minutes. It recommends jobs based on personality and gives you suggested occupations with links to job postings on Talent.com.

Have 10 minutes?

The O*NET Interest Profiler recommends jobs based on your interests and preparation level. Once you spend approximately 10 minutes rating 60 activities, it gives you a list of careers that you can click on for a summary (description, video, knowledge, skills, abilities, personality, technology, education, and job outlook.)

Have 15 minutes?

The 16 Personalities test is based on the Myers Briggs Model. In approximately 15 minutes you are able to learn about your personality type and core traits, discover your personal superpowers, better understand your personal relationships, and learn how to navigate the professional world (You don't need a premium account to view this information).

Have 30 minutes?

The CareerExplorer takes approximately 30 minutes, but it lets you save your progress along the way. It recommends jobs based on interests, personality types, abilities, career values, and preferred work and social environments. It produces a list of careers that you can click on for more details (compatibility, overview, salary, job market, how to become, jobs, education, further resources, satisfaction, demographics, and work environment.)
